## BQT teams with Zylotech for International Projects

Following a detailed evaluation of its global requirements for Secure Virtual Surveillance Systems, BQT Solutions Limited (ASX:BQT), a security technology provider with an international presence, has selected Zylotech as its global strategic alliance partner. This alliance provides the seamless integration of Zylotech's Smart G Enterprise Protection™ system into the BQT Product and System portfolio to greatly enhance the delivery of full turnkey security and surveillance solutions for BQT high-profile customers around the world. This is a significant development in recognition of Zylotech's counter-terrorism enhancement technology for government agencies, new national infrastructure and the Enterprise.

*"We are happy to have Zylotech as a technology partner because they provide a quality surveillance system that meets our clients complex requirements and will enhance turnkey solutions, particularly in the Middle East where the Zylotech capability will allow BQT to deliver a fully integrated, one card, access, surveillance and e-purse solution covering Residential Apartments and Villas, Commercial Offices, Sports Stadiums, Clubs and Academies",* said BQT Group CEO Anastasios Angeloglou.

Harnessing cutting edge third party technologies, BQT has delivered complex and integrated solutions to Corporate, Military and Government clients.

Keeping ahead of the technology evolution BQT employ the world's best firmware and software engineers contributing to the company's ability to customize and integrate third party technologies to achieve specific functionality expectations.

Zylotech's Smart G Enterprise Protection™ is the Real-Time Digital Video Management of the core BQT/Zylotech solution. The system is triggered by intelligent motion detection and other dynamic events and connects directly to existing alarms, PA systems and CCTV. Multiple cameras automatically 'follow' persons and automatically 'push' video/audio to security operators or mobile guards over a Wide Area Network. Persons or vehicles detected in 'no-go' areas are automatically trapped with dynamically triggered maps showing the exact location of such targets. The solution is complete with *SmartALERT*, FPA's 'Best New Product Award' winning Emergency evacuation product.

Zylotech have worked hard with BQT to provide a high level integrated solution that complements cutting edge technologies by both companies. This as a win-win situation for us, and more importantly, our customers. The enhanced overall solution is jointly marketed through direct and independent global channels and Zylotech gains the advantage of BQT's Middle-East presence and international customer base.

Anastasios Angeloglou  
CEO - BQT Solutions Limited
