

EMV Contactless Card Reader for Access Authorisation

SOLUTION FACT SHEET

A Reader is required to provide access based on EMV standards using ISO/IEC 14443 cards, such as Visa, MasterCard, American Express, JCB and Discover/Diners Club Cards

BQT has the SOLUTION with BQT Solutions specialist readers.

The BQT Solutions specialised readers using ISO/IEC 7816-3 transmission protocol reads the PAN number from the card chip then transmits this data to the Access Control System (ACS) which then determines if the card is authorised to access the site .

The typical use for this reader is to provide card read information so that physical access may be granted or denied to sites such as secure ATM kiosks or vending machine vestibules.

Other card information may also be read by the BQT Solutions reader and transmitted to the ACS on request.

BQT Solutions can also provide a multi-technology reader with EMV and 125KHz Prox, Mifare Classic, Mifare DESFire EV1 and Mifare Plus.

Your choice of BQT Solutions Reader:

BT815-6

BT815F-6

BT930-6

BT950-6
